

February 1, 1995

This notebook appeared in our bedroom (probably mother was cleaning up and ran on to it and didn't know what to do with it, so she put it on the sewing machine) today. As we looked through it ~~and~~ we realized that it was a sampling of the kind of record keeping that Dad Delamarter did in his poultry business. We realize it was only a sampling of the kinds of records he kept, perhaps these are some of the earlier ones he started. He kept extensive Trap nesting records on his breeding flocks as well, up into the 1960 when ~~we~~ ^I first knew him he would still trap nest. I'm sure other records were kept on the hatchery end of his business as well as the flocks that other farmers kept for him and sold him the eggs for hatching.

In short we realized ^{For the first time!} that there was a member of our own family that used to like to keep a record of sports events and the like. Yes Dave Knopf probably inherited an interest in statistics from his grandpa Delamarter.

This notebook should be offered to Dave first if he is interested in this moment of his interest in statistics.

200 - 1000000

1937 chicks
